

Aegex Solutions for Emergency Response

Fast, safe communication is critical in emergency situations. First responders need to connect and quickly understand the current conditions to save lives and mitigate disasters.

When every second counts - Aegex delivers - safely.

Intrinsically Safe Tablets

aegex10™ Intrinsically Safe Tablets are trusted by public safety and emergency response organizations around the world. Globally certified for combustible environments, Aegex tablets are safe to use in emergency situations when explosive gases or other volatile materials are present.

Aegex tablets allow teams to use smart, cloud-based applications to safely and efficiently:

Communicate

- Email or text information
- Talk via Voice-Over-IP
- Capture and share photo/video
- Collaborate among team members

Share Data

- Visualize IoT sensor data
- Analyze inputs
- Consult documents
- Record observations & activities

Report Status

- Map GPS location of team members
- Triage victims
- Send/receive alerts
- Send/receive instructions

Emergency response and public safety communities rely on Aegex to connect safely with innovations that drive improved performance in hazardous environments.
