Improve Communications
in Hazardous Environments

- aegex10™ Intrinsically Safe Tablet
- Sensear Intrinsically Safe Headset

The ability to effectively communicate while working in hazardous areas becomes even easier when using the aegex10™ Intrinsically Safe Tablet paired with a Sensear Intrinsically Safe Headset. In addition to LTE and built-in Wi-Fi, enabling VoIP via the tablet allows users to effectively turn the tablet/headset combination into a phone with voice and video to ensure effective, real-time communication. **Utilizing the Windows 10 IoT platform, users can collaborate via such applications as Microsoft Teams.**

The Aegex10 IS Tablet is purpose-built for use in the most hazardous zones of explosive environments.

Globally certified under the highest standards of safety for some of the most explosive environments, the Aegex Tablet meets ATEX/IECEx Zone 1 and Class I, II, III Division 1 requirements.

The Aegex tablet is part of a fully integrated platform that brings real-time communications and data management to the world's most hazardous industries, helping them to begin their digital transformation to Industry 4.0.

Sensear
Hear Speech Stay Protected

Sensear's industry-changing SENS® technology simultaneously combines speech enhancement with noise suppression to deliver a total high noise communication and protection solution by recognizing the different properties of speech and background noise.

SENS® enables users to remain aware of their surroundings, communicate face-to-face in noisy environments and protect their hearing from harmful noise.

Intrinsically Safe ATEX, IECEx, UL & CSA approved, certified to some of the strictest standards.
